BLOOD SWORD

An Arctic wind freezes your bones, but ahead of you lies a smoking chasm as it goes right down to the glimmering fires of hell. You stand at the top of the abyss which surrounds Spyte, the ruined fortress of the Lords of Krarth.

In the darkening sky above, five ominous stars have come into conjunction for the first time in 200 years. Out of the vault of the sky they cast their baleful influence across the frozen landscape. They are disembodied spirits of the last of the Magi seeking the return to the mortal world at midnight and ushering in a new era of terror.

You wield the sole forge in the world capable of destroying the Magi. The Sword of Life is mankind's only hope – but it is no guarantee of victory. The Magi have had two centuries of exile to plan their reincarnation. To stop them you will need greater courage and strength than ever before.
